# lokalise AI

Rest assured that your data is safe

We use OpenAI

Open AI — API — Lokalise AI

Lokalise AI connects to Open AI through an API, to send data back and forth for translation.

Data transfer is secure

Once data leaves Lokalise AI, it's transferred through Transport Layer Security (TLS). The industry standard for encrypting and protecting your data.

Is my data stored?

UP TO 30 DAYS

Data is securely stored in OpenAI for up to 30 days for abuse and misuse monitoring, after which it will be deleted.

NEVER FOR TRAINING

Your data will not be used to train OpenAI's models, unless you opt in.

We are all compliant

	GDPR	AICPA SOC

Open AI takes security very seriously

Carries out regular security audits

- ✓ To identify and address potential vulnerabilities
- ✓ To maintain a high level of security
- ✓ To make sure identified issues are promptly resolved

Continuously monitors and detects threats

- ✓ To monitor system activity and network traffic for any suspicious behavior
- ✓ To identify and mitigate potential security threats in real-time
- ✓ To reduce the likelihood of data breaches

What this means for your data

Your data is protected by secure infrastructure and you can rest assured that it will never be used for training purposes without your permission.
